

# Is Your Business Really Protected Against Data Loss?

## Backup Assessment

When disaster strikes—whether it's ransomware, hardware failure, human error, or natural events—your ability to recover quickly determines your business's survival. Many organizations don't realize their backup strategy is outdated or incomplete until it's too late.

Our Backup Assessment helps you uncover gaps, evaluate recovery readiness, and define a path to modern, resilient data protection.

### Why It Matters

Too many businesses rely on outdated backup systems or assumptions that "it's working." Without a reliable and tested backup and recovery strategy, you're exposed to:

- Prolonged downtime
- Lost revenue and productivity
- Permanent data loss
- Regulatory non-compliance
- Reputational damage

### What We Review

Our assessment will review your current environment and provide a full analysis of:

- On-prem and cloud backup systems
- Storage capacity and redundancy
- Backup schedule, retention, and encryption
- Recovery Time Objective (RTO) & Recovery Point Objective (RPO)
- Data protection gaps and vulnerabilities
- Opportunities to reduce risk and improve efficiency

### What You'll Get

- **Expert analysis** of your current backup strategy
- **Clear recommendations** for modern, secure, and scalable data protection
- **Custom roadmap** to improve resiliency, reduce risk, and align with best practices

### Why Sourcepass MCOE?

As a trusted IT and cloud solutions provider, Sourcepass MCOE has helped hundreds of companies modernize their infrastructure and safeguard their data. Our experts bring deep technical expertise, a security-first mindset, and a commitment to doing what's right for your business.
